they brought the truck back because all controls will only raise the liftgate. you can push the manual release and it will allow you to lower it one second at a time. there is a LED light that shows F1 C1 indicating there is a short somewhere in the solenoid for the V1 valve. I have been searching everywhere for the short and cannot find it yet. Will need more time to diagnose. RB

waltco lift model: BZ33 Serial#: 719889 Date: 7/2016  
ZEPRO Tail lift type: ZHDL 2000-155 MA Production#: 312765 Date 2016.

i have traced all the wiring and nothing is shorted to anything. after checking everything over multiple times there are no longer any fault codes present in the system but it will not go down. Im not sure what to do at this point. RB

after talking with Robbie and he took a look at it. We agreed it could be the control head and one sensor but there is no way to be sure. the control head part #16629000 is \$722.76 and the sensor part #Z33797TL is \$201.82. Or we could send it to Hiab USA in Des Moines who is a certified Waltco lift repair center and they could probably diagnose it properly and may be cheaper to fix. RB  
09/09/2021 @ 11:13:

finally spoke with Robert from waltco phone# 716-553-5122. he told me that in order to lift the liftgate the V2 valve must be activated. and to lower the liftgate the V1 and V2 valves have to be activated. I found there is no power getting to the V1 coil. if i jump power to it the liftgate will lower.

i looked at the control head and there is no power coming out of that going to the V1 coil so im not sure if the control head is bad. RB  
09/09/2021 @ 15:46:48

ordered a control head from cortez it will be shipped directly to us expected to be here monday or tuesday. RB  
09/09/2021 @ 16:31:29

The control head was wrong. I called Robert at Waltco and discussed the issue. He said it sounds like they ordered the part for a 2006 instead of a 2016. He gave me the parts manual and I called Cortez again to get return info for the part we received and the part number of what we need. Maria at Cortez is going to get cost and availability and return info and call my cellphone back. JW

Went out to start the truck. It wouldn't start. I came in to get the jump pack. The jump pack wasn't enough to start it. Had to come back in and get the keys for the truck to use it to jump this vehicle. Im going to put two new batteries in it. Found it needs two new tires in the front. The right rear outer tire hit a curb and split the tire and slightly bent the wheel. We have an extra wheel and tire that Im going

Found the truck. Liftgate was about a foot off the ground. I told the drive I would follow them back to the barn. I flipped all the switches off and then back on on the dash. Robert was messing with the buttons on the passenger side at the same time and the liftgate started working. I went up and down with it multiple times to make sure it was operating properly. JW

DRIVER STOPPED BY AND SAID THE 120V BLOCK HEATER PLUG END IS MELTED AND ARCS WHEN PLUGGED IN. I INSPECTED AND CONFIRMED THE ELECTRICAL PRONGS ARE SEVERLY MELTED. I DECIDED TO CUT THE PLUG END OFF SO THAT THE DEPT. DIDN'T TRY TO USE IT (I'M CONCERNED IT WILL START A FIRE). NAPA HAD THE PLUG END AND I ORDERD IT.

WHEN THE PART COMES IN WE WILL NEED TO WIRE IT IN.

NOTE: THE DRIVER SAID THE LIFT GATE IS CLOSING BETTER AND CLOSES THE BEST WHEN OPERATED BY THE DRIVER SIDE REAR CONTROLS.

Liftgate dropping by itself. JVO.  
03/22/2023 @ 10:09:52

Looking into the issue that does not happen all the time. Took the valve out to make sure there is nothing in the valve causing it to bleed off pressure. Took switches apart and found a corroded section of one switch. Both outside switches have the back covers coming apart allowing moisture to get inside. One of the wires wasn't tight and when I went to tighten the connection the plastic switch broke. Jessie is looking into ordering new outside switches. RB  
03/22/2023 @ 11:59:29

Replaced both of the outside controlers and redid all the the electrical connections to them. Everything is working properly. I parked it outside with the liftgate straight out like it would be at a dock. I am going to leave it like that overnight and see if it moves. RB  
04/05/2023 @ 16:12:43

Liftgate did not move after sitting overnight, we can give the truck back to the department and see how it works for them. RB

NOTES

Replaced front brake pads and rotors. The wheel studs were extremely rusty and the threads stretched and were damaged removing the lug nuts. Ford parts were backordered so I sourced everything I could from all the parts houses in town. I replaced all the front studs and lug nuts. Torqued the lug nuts to 165 ft/lbs and test drove. Double checked torque after test drive and truck is good to go. RB

THE DRIVER BROUGHT THE TRUCK IN AND SAID WHEN USEING THE LIFT THE OTHER DAY THEY HEAR A POPING/CREEKING NOISE WHEN USEING THE LIFT.

I INSPECTED IT AND FOUND THERE TO BE A SEVERAL FOOT BREAK IN THE WELD OF THE LOWER LEFT CORNER OF THE PLATFORM. HE ALSO WAS WONDERING IF THE STEEL TRANSITION AFTER THE ALUMINUM FLOOR BUT BEFOR THE PLATFORM COULD BE LOOKED AT. IT IS CAVED IN FROM YEARS OF PULLING A PALLET JACK OVER IT. I CALLED HAWKEYE WELD AND LEFT A MESSAGE FOR KEITH TO CALL ME TO DISCUSS THE REPAIRS. I TOOK PICTURES OF THE DAMAGE AND ALSO EMAILED THEM TO KEITH @ HAWKEYE WELD. I TEXTED SCOTT YEGGY @ GEN STORES TO LET HIM KNOW WE WERE WAITING TO HERE FROM HAWKEYE WELD BEFORE WE PROCEED FORWARD WITH ANYTHING.

04/04/2024 @ 12:06:47-JM

THE DEPT TOOK THE VEHICLE OVER TO HAWKEYE WELD AND KEITH LOOKED @ IT . HE SAID TO CALL HIM ON MONDAY TO CONFIRM A TUE OR WED APPOINTMENT.

TEXTED SCOTT @ GEN STORES AND LET HIM KNOW THE PLAN.

04/05/2024 @ 10:05:28-JM

TRUCK WENT OVER TO HAWKEYE WELD FOR APPT. TO GET REPAIRED. KEITH @ HAWKEYE WELD CALLED AND SAID THE VEHICLE WAS DONE @15:00 ON 4/10/24. HE SAID HE WOULD HAVE MARISSA EMAIL ROXY AN INVOICE. I CALLED PAT TO LET HIM KNOW THE TRUCK WAS DONE @ 15:05 ON 4/10/24.

04/11/2024 @ 06:36:32-JM

STOPPED BY THE MOSSMAN BUILDING AND CHECKED ON THE PLATFORM LIFT REPAIR AND THE BOX FLOOR TRANSITION REPAIR. BOTH LOOK OK.

04/11/2024 @ 15:02:40-JM

THE DEPT PICKED UP THE TRUCK.
