

getVICKI Touch-free | Self-Checkout

VIRUS-KILLING

technology helps keep *The VICKI Smart Store* safe and sanitized

- ✓ Protects retailers & customers
- ✓ Restores customer confidence
- ✓ Lowers labor costs

Promote *social distancing* with our *line-busting kiosk!*

AI Virtual Attendant

VICKI can answer customer questions and help guide them to the right product.

Touch-Free

Customers can open a VICKI Kiosk without touching the machine. Once open they are free to shop safely.

UV-C Self-Sanitizing Tech

VICKI will automatically clean the products after each customer.

Customizable Layout

Adjustable heights and different shelf sizes afford for multiple products.

QR & Contactless Payment

Consumers can pay and access any VICKI Kiosk by scanning a QR code or using Tap-To-Pay including ApplePay.

Pick-up Capabilities

Using the VICKI Rewards App customers can order ahead and pick up food or other products at a VICKI Kiosk.

A VICKI for:

-  Age Verification
-  Merchandise and media
-  Extend brand reach
-  A new retail experience
-  Loss Prevention
-  VICKI Platform

Features

- First AI virtual assistant for retail
- UV-C Self-Sanitizing Technology
- NFC / QR Code / Card and Biometrics for payments/access
- Customizable layout with dynamic lighting
- Computer vision and Intelli-Shelf to track product
- Web-based management software and reporting
- Exterior paint / branding / imagery to truly make VICKI your own

UV-C Technology

VICKI has built in UV technology to ensure all contact points and products are clean and sanitary before any customer interaction. This will ensure that no germs or viruses can be transferred during machine use.

After each customer uses a VICKI Kiosk, for a period of 60 seconds, the machine will self-sanitize the products and inside surfaces.

UV light is a reliable, well-studied antimicrobial technology. It works primarily by destroying the DNA inside bacteria, viruses and fungi. The high-energy portion of the UV spectrum called UV-C is most effective.

Trays

	Tray Type	Product Width	Configuration Options
Mini	.5X	¾" - 1¼"	14 products across
Small	1X	2¾" - 3¼"	7 products across
Medium	2X	6¼" - 6¾"	3 products across + 1 (1x) product
Large	3X	9⅞" - 10¼"	2 products across + 1 (1x) product

Specifications

- Limited footprint: 35.7"W x 79.65"H x 32.24"D (door closed) or 59.50"D (door open)
- Adjustable shelving for customized POGs by VICKI system by location if desired. Visual opening space: 25.50"W x 48"H x 20.125"D, however ~2.5" of space is left between the back of the tray and the inside backwall grid. Shelves are easily adjusted.
- Intellishelf™ units are generally 1X and 2X sizes. They can be arranged in a variety of combinations providing layout flexibility with good pack out depending upon the SKU. Shelves can be programmed to light up with full RGB range of colors.
- Refrigerant R290 / 3.17 oz. [90g]. Cools to 34° F.
- Standard U.S. cellular communication with point-to-point encryption
- Approximate weight is 850 lbs.
- Uses standard 3-prong 120v AC plug
