

Holms Pick-Up Sweeper SU

For Compact Wheel Loaders, Skidsteers and Tractors

Easy, clever and flexible

Holms SU is a flexible compact sweeper for use with compact loaders, tractors and skid steers. With few moving parts, few components and minimal brush wear, you are guaranteed an attachment with low maintenance costs. A thorough cleaning with a high-pressure jet at the end of the day is often the only thing required to prepare the attachment for the next day's work. Holms SU is supplied complete with a sprinkler system, hydraulic hoses with quick couplings, electrical wiring for the cab, tilt and height indicators and standard hooks.

The brush roller is suspended from a unique three-lever linkage, which allows the roller to always follow the ground's surface both vertically and horizontally. This design ensures you constant optimal ground pressure, which produces the best sweeping results with minimal brush wear. Holms SU has a low-level design to provide good visibility from smaller carriers. Available in three sizes. The hooks are attached to the frame by u-bolts for easy replacement.

Release the straps and lift the tank for easy access to the brush roller and the refuse container for cleaning purposes.

Holms SU	1.50	1.85	2.15		1.50	1.85	2.15
Working width (ft)	4.9	6.1	7.0	Effective waste volume (cu.ft)	6.0	7.8	8.8
Max. width (ft)	5.3	6.4	7.4	Weight empty, excl. hooks (lb)	639	672	705
Max. height, excl. hooks (ft)	2.6	2.6	2.6				
Brush diameter (inch)	24	24	24	Weight with full tank and container, equipped with gutter brush (lb)	1820	2150	2260
Water tank volume (gall)	50	63	63	Min./max. oil flow (gpm)	8/21	8/21	8/21

All weights are approximate. Attachment weight excludes hooks.
