

Location Name SWAIN COUNTY HIGH SCHOOL

Date 5/28/25

Address 1415 FONTANA RD BRYSON CITY NC 28713

Phone # 828-488-2152

Lift Serial # 02987

Model # WFP-12E

Bay # #2

Lift Type	Surface		2 Post		4 Post		Scissor		Low/Mid Rise		Hinge		Hydraulic Portable	
	Inground	Single Post	Twin Post	High Pressure	Fore & Aft									
Capacity	<u>12,000</u>		Capacity Decal Located On Lift		Pass	Needed	Accessibility of owners manuals, safety instructions & lifting point information		Pass	Needed				
Common Inspection Points All Lifts											Pass	Attn Needed	Fail	N/A
Accessibility and readability of safety warning labels on lift											X			
Confirm adequacy of clearances around lift											X			
Examine structural components including welds for signs of fatigue, overloading, misuse												X		
Inspect lift controls for proper operation												X		
Check fluid levels and contamination (HF) <u>NOT EVEN GOING UP OR DOWN</u>												X		
Examine electrical components & wiring												X		
Check all points requiring lubrication <u>(HF) LOWERING VALVE BAD</u>												X		
Check for proper installation and condition of spotting dish													X	
On lifts employing adapters, check condition and proper operation												X		
Are Extended Height adapters available												X		
Check all accessories for construction and labeling												X		
Check all fastening devices for tightness including floor anchor bolts												X		
On lifts incorporating overhead structures, verify the safety shutoff operates properly												X		
Operate the lift and check the operation of the lift locks, including latch cables												X		
On lifts incorporating secondary latch devices, check operation and condition												X		
Hoses, Piping, Tubing & Hydraulic Cylinders														
Check all accessible piping, tubing, hose, valves, fittings for visible leaks & proper routing												X		
Check hydraulic cylinders for smooth operation and leaks												X		
Cables, Chains & Sheaves														
Inspect sheaves for proper alignment and cracks. Ensure sheave shields are in place													X	
Inspect all cables and/or chains for frays, stretching, corrosion, cracking and proper adjustment													X	
Check the tracking and routing of cables and chains													X	
Lifts using swing arms, runways or platforms														
On lifts using swing arms, check telescoping stops													X	
On lifts requiring swing arm restraints, check for proper function and abnormal wear													X	
On lifts using runways, check to ensure proper operation of all features												X		
On lifts equipped with platforms, railings or stairways, check to ensure proper operation of all features												X		
Inground Lifts														
Report water in sub-floor pits or enclosures													X	
On air-oil lifts check for low oil control													X	
Confirm rotation prevention device on single post lifts													X	
On lifts which incorporate trench covers, verify proper operation and abnormal deformation													X	
Check integrity of tamper resistant seals on relief valves													X	
Inspect plungers for signs of rust, corrosion or damage													X	
Confirm single point operation of multiple powered posts													X	
Hydraulic Portable Lifts														
Check screw drive systems for proper operation and lubrication													X	
Check mobility of individual units													X	
Run lift through full cycle and verify proper shut off at top and bottom of travel													X
