Material and/or parts furnished on this order have been manufactured in accordance with applicable instructions and/or specifications. The parts configuration herein area as used in manufacturing and when installed, will be per type design. Part(s) may have pilot holes or holes omitted, excess trim and/or parts omitted for ease of installation. We hereby certify that these goods were produced in compliance with all applicable requirements in section 6, 7 and 12 of the fair labor standards act, as amended, and of regulations and orders of the United States.

User / Installer Responsibilities					
It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article. Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1. Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
