Description:

We are offering a set of eleven (11) industrial-grade mild steel storage tanks, each with a 300,000-liter capacity, previously used for edible oil storage. These tanks are well-suited for industries requiring heated liquid storage, such as food processing, chemical manufacturing, and biofuel production. The tanks can be repurposed for heating fuel or bulk diesel or lubricant storage. The vertical footprint makes them space efficient and compact.

Location:

- Lower Johannesburg South Arica

Key Features:

- Material: Mild steel with thermal insulation for temperature regulation
- Heating System: Internal steam heating coil for maintaining product viscosity
- Agitation System: Side stirrer for uniform mixing and temperature distribution
- Access & Maintenance: Equipped with a manhole for easy cleaning and inspection
- Structural Integrity: Mounted on concrete bases, designed for long-term industrial use.

Deadline:

Offers to be submitted by the 16th of May 2025

Inspection and Information:

Contact Clinton Jensen on 082 054 2189 or email clinton.jensen@liquidityservices.com for more information or to book a site visit inspection (by appointment only.)
