

Description:

2013 Twin-axle Scorpion Multipurpose

Features:

- 2-ton load capacity
- 3-meter long load bed and equipped with brakes
- Robust construction with a black metal frame and a beige or light-colored load bed, finished with corrosion-resistant paint for durability.
- Fitted with two axles, each supporting a pair of rugged off-road tires in good condition
- The load bed is enclosed with high, mesh-like side front panel and a rear gate, providing security for the cargo.
- A loading ramp is included for easy access to the load bed.
- The trailer features a lockable toolbox mounted on the front side for secure storage of tools or equipment, along with a spare wheel and a jockey wheel for convenient manoeuvring and support when detached.
- A valid license plate and NATIS documents, it is roadworthy and legally registered.
