

GO FORWARD SCANNERS

Forward Biometric Body Scanner....

These biometric scanners were used in a Go Forward medical facility.

The below link details what the scanners were used for.

https://www.youtube.com/watch?v=_h8QvloSTsE

Not much is known about them and information on the internet is scant.

Both scanners do power on and the iMac mini also powers on, but because there is no internet connection, no apps or other information displays.

We do not know if the iMac Mini's are locked or remote managed.

We do not know if any of the other components are organizationally locked or remote managed.

No passwords are available.

These scanners are approximately 9 feet tall and extremely heavy. The winning buyer is responsible for removing them directly from the facility. No assistance will be provided to move, pack, transport or secure the items.

The parts listed below, make up the major components of the scanners.

SCANNER 1

MMP TM57-GPK52-100. Midwest Motion Products custom reversible DC gearmotor.
