

Asset Cataloguing Notes

Client Name:	Civil & Power Generation Projects (Pty) Ltd ("CPGP")
Site:	No 240 Karri Road Agricultural Holdings (AH) Benoni 1509
LOT Number:	TBA
Date:	03/07/2025
Asset Description:	
Jenny or Swaging Roller Machine	
The Jenny, also known as a swaging machine, is a versatile piece of equipment widely used in metalworking and sheet metal fabrication. This machine is designed to shape, bend, and form metal sheets or tubes through a process called swaging, which involves reducing or altering the diameter and shape of the material using rotating dies or rollers. Commonly found in industries such as HVAC ductwork manufacturing, automotive restoration, and general metal fabrication, the Jenny machine is valued for its precision and ability to create consistent, high-quality edges and curves.
