Observations / Comments

The unit starts and operates. The unit's year has not been provided nor found on the unit's serial number tag. The bucket cutting edge is worn and missing the bolt-on cutting edge. The unit shows signs of paint damage, and the windshield is damaged. The cab louvers are also in poor condition, and the foot pedal pads are missing. The antenna appears to be damaged, and the coolant level is low, which may indicate a possible leak or the need for a refill. The operator seemed not to turn on the front lower lights and all rear work lights are not operational.
