NOTES				
Generator PM - 9/8/2021 2183 hours Oil was slightly low when vehicle arrived, and oil over the generator from a leak. Changed generator oil and filter. 2 qt 15w-40. Complete. ; Oil leak - 9/8/2021 Cleaned generator and checked for oil leak. Found oil seeping from oil pressure switch boss. Removed oil pressure switch and found it had no sealant on pipe threads and was not very tight. Cleaned and installed sealing tape to threads, reinstalled switch. Checked for oil leaks, no further leaks found. Complete.

NOTES					
Generator - Generator won't turn over. ; Hours - 3/7/2022 3407 ; Generator diag - 3/7/2022 Confirmed generator is hard to start but cranks ok. Fuel smell from exhaust. Removed oil cap to check level, added .65 qt 15w-40. Still would not start, removed air box and a spark plug lead to check for spark. Ignition has good spark. Suspect engine is flooded after being cranked with low oil. Disconnected fuel line and cranked engine over to clear fuel from cylinders. Got generator to start, but it was only running on one cylinder and shortly shut down, blink code 3 (service needed). Used starting fluid to fire it again, and it started slow but fired on both cylinders. Lots of blue smoke from exhaust. Ran generator for 30 minutes to heat up and burn any excess fuel from the cylinders. Shut down for 10 minutes to check starting while hot, generator had trouble restarting. After sitting for 2 hours, generator started ok and ran. Engine appears to have been flooded due to low oil preventing it from running. ; Previous oil leak recommendations - 3/7/2022 Vehicle was previously in for an oil leak and was recommended to go to vendor for repairs. Work order 170354 on 09-29-21 ; Generator PM - 3/8/2022 3407 hours Changed generator oil and filter. 2 qt 15w-40. Complete.

TOTAL LABOR:	\$774.940	TOTAL MISC:	\$25.000	TOTAL COST:	\$5,671.915

NOTES
<p>Generator - 3/9/2022 Generator would not start this morning. After cranking for a while, got it to fire on one cylinder only. Could not get it to properly run. Engine switch has blink code 3, code 36 - engine stalled Suspect engine may have internal damage from being run low on oil, will need to go to vendor for full diagnosis and repair. ; Customer call - I spoke with Kathy and she said they will pick up the food truck. ; exhaust - installed cat theft device on the exhaust ; Cummins - Vehicle taken to Cummins to have generator switched out and serviced. ; Cummins -</p> <p>Cummins swapped out generators. Unit is ready for pick up. They will continue to work on the generator.</p> <p>; Customer update - Emailed customer update on repairs. ; Vehicle return - Vehicle returned from vendor but vehicles generator is still at Cummins. ; Check Engine light - The Check engine light came on when the vehicle returned from Cummins. ; truck missing - 3/17/2022 Truck isn't here to work on ; Check engine light - 3/17/2022 Confirmed check engine light on. Retrieved codes, all tests pass and P0420 stored in memory - catalyst efficiency. As catalytic converter was recently replaced, cleared codes and checked response of oxygen sensors suing scan tool and supplemental fuel. sensors respond correctly. Cleared keep alive memory and test drove vehicle to complete a drive cycle with catalyst monitor. After driving vehicle, rechecked codes, P0420 pending failure code. Suggest replacing downstream O2 sensor with OE part and rechecking before condemning converter. 3/23/2022 After replacing O2 sensor, cleared KAM and performed drive cycle to complete catalyst monitor. No pending codes after completing drive. Cleared KAM again and completed catalyst monitor again, no codes stored or pending. Vehicle can return to service. ; Generator - 3/23/2022 Customer stated that generator was low on oil and would not run. Checked oil, found it slightly below max mark on dipstick. Added 0.5 qt 15w-40. Tried to start generator to check oil level and operation, generator still would not start. Manually operating choke allowed generator to start. Checked adjustment on governor spring and altitude compensation vs the generator on unit S30970, found significant difference on spring. Moved governor spring to the location on other unit and generator started up. Let generator sit for 30 minutes and rechecked, started with no issues. If there are further problems, generator may need to be rechecked by Cummins ; Oxygen sensor - 3/23/2022 Raised vehicle to replace downstream oxygen sensor. Found sensor had been replaced with an aftermarket universal sensor. Installed factory part and checked for errors, none recorded. Cleared KAM and performed testing see other note for more information. Complete. ; Vehicle ready email - Emailed customer vehicle is ready for pick up. ; Vehicle Picked Up - Customer picked up vehicle. ; Requisition # - RQ-1000767422 PO-1000786784</p>

NOTES				
Generator - 3/28/2022 Chad started generator, took 3 tries but correctly started. After running for 30 minutes, checked generator, found flashing light on switch (indicates engine run only mode, no electricity production). Stopped generator and restarted, it ran for a few seconds then stopped with code 3-15 (unable to produce more than 54Hz). Restarted, stopped with same code. Engine is running ok, has generator problems, should go to the vendor to recheck. ; Cummins - Vehicle taken to Cummins. ; Customer Call - I spoke with Kathy and let her know vehicle concerns. ; Cummins - Cummins will work on new generator tomorrow. They have ordered new engine for old generator. It will be in next week. ; Customer update - I spoke with Nate and gave update. ; Cummins/Customer update - I spoke with Cummins and they said the new generator is in need of a generator part. They are waiting to see when the part is going to come in. They stated that the part is readily available. Thanks Nick ; Estimate - Estimate sent to customer. ; Cummins - I called to get update on repairs. Waiting for a call back. ; Cummins - Vehicle is ready at Cummins. They are still working on generator. ; Vehicle update - Vehicle picked up from Cummins. The old generator is still being worked on. As soon as it is repaired it will go into s30701. Then the invoice will be complete.

NOTES				
Generator Inop - 8/5/2024 8:29:50 AM Customer states that generator when on and attempting to engage will not supply power to vehicle. Please check and advise. ; Generator inspection. - 8/5/2024 9:28:03 AM Performed inspection for concern, Found generator will run, no output at this time. Removed cover to generator and found operation light to be blinking. Found information on generator and was able to retrieve a code 45, indicating issue with generator speed sensor. Performed visual inspection of wiring and found no issues. Need to send to vendor for proper repair. ; Cummins Contact - 8/5/2024 11:10:59 AM Called Cummins and spoke with manager. Was able to have vehicle taken over on the 12th of August. Will drop vehicle off on Friday the 9th so it is at the shop ready to go for the following week.
