

SIMULATOR TRAINING

START-UP PROCEDURES

1. Turn on the Main computer by pressing its Power button.
2. When prompted, enter the “**password**” and press enter.
(**password** is the password)
3. The simulator computers are automatically turned on.
4. To assure that the system has powered-up correctly, check the following:
 - a) All three displays on the simulator should display the L-3 logo window.
 - b) The power switch should display a green light.
 - c) The touch screen console should be displayed.
 - d) The “MDYN” indicator in the simulator tile on the main screen should be green.
5. Starting from the key side of the simulator, explain the controls to the student.
Proceed from the left side controls to the seat controls, to the seatbelt, to the right side controls to the dash controls.
6. Once you have completed the training you can start the shutdown procedures.

SHUTDOWN PROCEDURES

1. From the System menu on the Main screen, click on Shut Down Simulators.
2. The Shutdown confirmation screen appears. Click **Yes** to shut down.
3. On the Main computer screen, press the Start button (located at the bottom left of your screen).
4. Select Turn Off Computer.
5. Once the computer has shut down, use the remote control to turn off the monitor. Be aware, the remote control also controls the Simulator screens so keep the remote close to the Main monitor so you won't access the Simulator monitors.
