

Lot of 23 Dell Optiplex 3070 SFF Desktop Computers

These desktops were new in June 2020 and used daily by adults in a school environment for approximately 4 years. They have the expected minor wear and tear. They feature a semi-all-in-one design with a 19" monitor and computer attached to a single stand. They are all believed to be in good working order. That said, this equipment is being sold strictly as-is with no guarantees.

Use the link included in the listing to get more information regarding the build specs of this group of desktops ("View product specs" can be found under "Quick Links"). The information from Dell provides the original build information of one device from the group and should be an excellent representation of all.

Example Service Tag: GH7SR33
